SecurView® RT
Workflow Solutions

SecurView® RT
Technologist Workstation

Workflow Solutions for the Breast Imaging Suite

Our SecurView® RT workstations bring a new level of flexibility and enhanced communication to the breast imaging suite for streamlined workflow and higher patient throughput.

The SecurView RT technologist workstation enables bi-directional electronic communication between the technologist and the physician. Annotations, comments, and instructions can be exchanged in seconds, enhancing workflow.

The SecurView RT manager facilitates efficient networking of multiple RT workstations, allowing technologists to access studies from multiple workstations and different locations.

System Configurations

Standalone

System operates as an independent technologist workstation and not as part of the SecurView RT manager. Standalone systems can be reconfigured as client systems.

Client

System will operate with multiple SecurView RT workstations configured with the SecurView RT manager (optional)

SecurView RT Manager Specifications

One SecurView RT manager can support multiple SecurView RT clients, depending on volume and workflow.

Computer	Server Class Hardware, Windows Server Based System
CPU	High-end Dual Quad Processor
Memory	6GB High Speed RAM Minimum
Storage Space	3.6 TB Minimum
Network Interface	10/100/1000 Base T Ethernet

Display Hardware

Monitor	21-inch LCD Color Monitor

Attached Devices

User Interface	Mouse, Keyboard
Power	UPS

Software

Operating System	Windows Server 2008
Controlling Software	Dedicated Mammography-based, Image Management Software

DICOM Services
