

Vyntus® ECG

The art of
diagnostic integration

Communicates wirelessly via direct Bluetooth®

Integrates conveniently with Vyntus® CPX

Supports single monitor all-in-one user view

Excellence in diagnostic and prognostic value

Connecting the heart with the lungs adds proven value to clinical outcomes. Cardiac abnormalities may become apparent only when the heart is asked to perform at increased workloads.

A powerful combo

The full and seamless integration of Vyntus CPX with the 12 lead Vyntus ECG through SentrySuite® helps laboratories leverage their medical device and HIT investments.

- One user interface
- One program to train
- One central database
- One combined report
- One network interface
- One connection with the HIS
